Mentalist Show

Using his understanding of human nature, Italian mentalist **Cripton Magic** can tell people what they are thinking—even before they know they are going to think it.

Using a profound understanding of applied human psychology, **Cripton Magic** creates indelible memories in this interactive, fun-filled show experience.

The Mentalist Show is designed to appeal to intelligent, adult audiences who want to be mystified, entertained and perhaps even inspired. The audience will be astonished at what their amazing minds can do, as Cripton Magic leads them on a journey exploring the depth and breadth of what is possible.

The show begins with a fully interactive demonstration of mind control. Guests will be stunned as they somehow seem to choose what Cripton has already predicted. Soon, the audience is eager to be part of the show—to see what they may be capable of themselves.

The Mentalist Show explores reading people—the signals and clues that everyone gives off as a part of communication. Cards and words merely thought of are revealed by studying the audience and reading their tells.

Unlike other mentalists, Cripton Magic is comfortable sharing the psychological principles on which his demonstrations are based and the presentation of each experiment is always dressed with elegance, engaging and fun sense of humor that distinguishes Italians.
